

STORAGE — Micro SD Card

SPI interface for ROM storage (SNES ROMs up to 6MB)

Design Notes:

- SPI bus @ 20MHz (R2-MED-5: trace length ~150mm + 6 vias → 40MHz unreliable)
- SNES ROMs: 256KB to 6MB typical (HiROM/LoROM)
- FAT32 filesystem for easy ROM management via PC
- 3.3V logic: no level shifter needed (module has built-in)
- SPI pins: GPIO38/39 (CLK/CS) + GPIO43/44 (MISO/MOSI) – split across WROOM-1 Left and right
- y2 TODO (R4-MED-1): add local 100nF bypass within 5 mm of U6 VCC
